ANTO JOVITA J

Aspiring Data Scientist | Python, Machine Learning, Generative AI

Phone: +91 8754051793 | Email: kavijami86@gmail.com | LinkedIn | GitHub | Portfolio

SUMMARY

AI & Data Science graduate with a strong foundation in analytical thinking, problem-solving, and developing data-driven solutions. Experienced in applying technical knowledge through academic and personal projects, with an interest in building practical AI applications and extracting meaningful insights from data. Eager to contribute to innovative projects, learn from experienced professionals, and grow in a collaborative environment.

EDUCATION

M.E. (Correspondence) | Global Institute of Engineering and Technology| 2026 – Present
B.Tech, Artificial Intelligence and Data Science | DMI College of Engineering | 2022 – 2026
CGPA: 9.2/10

TECHNICAL SKILLS

Programming & Databases: Python, SQL (Basic)
Data Science & Analytics: Pandas, NumPy, SciPy, Exploratory Data Analysis (EDA), Data Preprocessing, Statistical Analysis, Feature Engineering
Machine Learning & NLP: Scikit-learn, Linear Regression, Logistic Regression, Model Evaluation, Hyperparameter Tuning, TF-IDF
Generative AI & LLMs: LangChain, LangGraph, RAG, AI Agents, Tool Calling, Embeddings, Semantic Search, ChromaDB, Ollama
Data Visualization & Applications: Matplotlib, Seaborn, Power BI, Excel, Streamlit

PROJECTS

AI Data Science Analyst
- Built an AI agent app that lets users analyze CSV datasets through natural-language queries, using tool calling to run pandas operations.
- Tools: Python, pandas, Streamlit, LangChain, LangGraph, Ollama.

AI Research Agent
- Developed a RAG-based assistant for semantic search across uploaded research papers, returning answers grounded in the source text.
- Tools: Python, ChromaDB, Ollama (Qwen3, EmbeddingGemma), PyMuPDF, Streamlit.

Spam vs Ham SMS Classification
- Built an end-to-end NLP pipeline: EDA, text cleaning, TF-IDF features, and Logistic Regression tuned with GridSearchCV; evaluated with precision, recall, F1 and confusion matrix.
- Deployed as an interactive Streamlit app. Tools: Python, NLTK, scikit-learn.

Insurance Cost Prediction
- Predicted insurance charges with Linear Regression after preprocessing, statistical analysis and feature selection; deployed with Streamlit.
- Tools: Python, pandas, NumPy, scikit-learn, SciPy.

Additional: Emotion-Based Facial Recognition (CNN, OpenCV, TensorFlow/Keras) | KuralKodu, a full-stack civic complaint system (Node.js, Express, MongoDB)

INTERNSHIP EXPERIENCE

Data Analytics Intern | NoviTech R&D Pvt. Ltd. (Remote) | Nov – Dec 2024
- Completed a 30-day Data Analytics programme covering data analysis and visualization.

Web Design & Development Intern | TechnoHacks Solutions Pvt. Ltd. (Remote) | Jul – Aug 2025
- Developed responsive web pages using HTML, CSS, and JavaScript.

Web Development Intern | Codebind Technologies (Remote) | Oct – Nov 2023
- Worked on front-end development tasks using HTML, CSS, and JavaScript.

ACHIEVEMENTS & PUBLICATIONS

- **Research Publication:** Co-authored *AI-Driven Personalized Fashion: Virtual Try-On, Smart Resale Authentication, and Sustainability Ranking, published in IJREAT (2025).*
- **Top 5 Finalist:** WWT All India Women-Only Hackathon.
- **2nd Prize:** Figma Design Competition.

CERTIFICATIONS

- Data Science with Generative AI.
- Python 101 for Data Science – IBM / Cognitive Class.

SOFT SKILLS

Analytical Thinking, Problem-Solving, Communication, Teamwork, Adaptability.
